

Budget Dashboard

Your main question: what can I safely spend until next payday?

Import Monarch CSV

Import balances

Update balances

CASH ON HAND

\$0

Across included cash accounts

CYCLE BILLS

\$0

Planned for this pay cycle

ALREADY PAID

\$0

Manual + transaction matches

LEFT TO BE PAID

\$0

Your Excel SUMIF idea, automated

SAFE TO SPEND

\$0

Cash on hand minus everything still due before next payday

UNTIL NEXT PAYDAY

NEXT PAYCHECK

You can safely spend \$0

Cash accounts

Your workbook's "Total On Hand" logic is preserved here: account balances are summed first, then remaining unpaid bills are subtracted to show the amount that is actually free.
